

## **MSc in Business Information Technology**

**This programme is available only in Hungarian.**

The normal duration of the program is 4 semesters. The goal of the training is to produce experts who are able to understand complex business processes, to explore the arising problems and work out alternative solutions. They can recognize the surfacing demands that appear while using information systems supporting those processes. They are prepared to develop those and to manage ready-made applications. They possess the necessary skills to coordinate and conduct research and development, and to continue their studies at PhD level.
