PROCEEDINGS OF SPIE
SPIE—The International Society for Optical Engineering

Noise in Complex Systems and Stochastic Dynamics II

Zoltán Gingl
José M. Sancho
Lutz Schimansky-Geier
Janos Kertesz
Chairs/Editors

26–28 May 2004
Maspalomas, Gran Canaria, Spain

Sponsored and Published by
SPIE—The International Society for Optical Engineering

Cooperating Organization
SEDO—Sociedad Española de Óptica (Spain)

Volume 5471

SPIE is an international technical society dedicated to advancing engineering and scientific applications of optical, photonic, imaging, electronic, and optoelectronic technologies.

Contents

xi *Conference Committee*

xiii *Introduction*

xvi *Plenary Paper: Quantum fluctuations and life [5472-201]*
P. C. W. Davies, Macquarie Univ. (Australia)

xxv *Plenary Paper: Quantum noise and quantum communication [5468-203]*
T. Jennewein, Österreichische Akademie der Wissenschaften (Austria); A. Zeilinger, Univ. Wien (Austria)

SESSION 1 ANALYSIS, NEW METHODS, AND ISSUES OF GENERAL IMPORTANCE I

1 **Spatio-temporal complexity in the clusters generated by fractional Brownian paths (Invited Paper)** [5471-02]
A. Carbone, INFM, Politecnico di Torino (Italy); H. E. Stanley, Boston Univ. (USA)

13 **The description of nonstationary noise** [5471-03]
L. Galleani, Politecnico di Torino (Italy); L. Cohen, CUNY/Hunter College (USA)

20 **Properties of the reaction front in a reaction-subdiffusion process (Invited Paper)** [5471-04]
K. Lindenberg, Univ. of California/San Diego (USA); S. B. Yuste, Univ. de Extremadura (Spain)

29 **Statistics of level crossing intervals** [5471-05]
N. Fuchikami, Tokyo Metropolitan Univ. (Japan); S. Ishioka, Kanagawa Univ. at Hiratsuka (Japan)

SESSION 2 DISORDERED SYSTEMS

38 **Non-Gaussian resistance fluctuations in disordered materials** [5471-07]
C. Pennetta, E. Alfinito, L. Reggiani, INFM, Univ. degli Studi di Lecce (Italy); S. Ruffo, CSDC, INFN (Italy) and INFM, Univ. degli Studi di Firenze (Italy)

48 **A theory of magnetization reversal in nanowires (Invited Paper)** [5471-08]
R. S. Maier, Univ. of Arizona (USA)

58 **Quantitative phase-field simulations of the wavelength selection during alloy redistribution transients** [5471-09]
R. Benítez, L. Ramírez-Piscina, Univ. Politècnica de Catalunya (Spain)

SESSION 3 NOISE-INDUCED STATES AND TRANSITIONS

68 **Multiplicative white-noise-induced phase transitions: the role of the stochastic interpretation (Invited Paper)** [5471-10]
J. M. Sancho, O. Carrillo, Univ. de Barcelona (Spain); M. Ibañes, Salk Institute for Biological Studies (USA); J. Casademunt, Univ. de Barcelona (Spain); J. García-Ojalvo, Univ. Politècnica de Catalunya (Spain)

79 **Development of turbulence in submerged jets as a noise-induced transition (Invited Paper)** [5471-11]
P. S. Landa, M.V. Lomonosov Moscow State Univ. (Russia); P. V. E. McClintock, Lancaster Univ. (United Kingdom)

91 **Phase transitions in relaxational systems with field-dependent coefficients** [5471-12]
J. Buceta, K. Lindenberg, Univ. of California/San Diego (USA)

102 **Signal propagation in oscillatory media enabled by noise-induced excitability** [5471-13]
E. Ullner, Univ. Potsdam (Germany); A. Zaikin, Univ. of Exeter (United Kingdom); J. García-Ojalvo, Univ. Politècnica de Catalunya (Spain); J. Kurths, Univ. Potsdam (Germany)

SESSION 4 DYNAMICAL SYSTEMS AND NOISE-DRIVEN SYSTEMS I

109 **Parrondo's games with strategy (Keynote Paper)** [5471-14]
C. P. Van den Broeck, B. Cleuren, Limburgs Univ. Centrum (Belgium)

119 **Nonlinear phenomena in vortex matter** [5471-15]
M. Gitterman, Bar-Ilan Univ. (Israel)

125 **Parametric instability of linear oscillators with colored time-dependent noise** [5471-16]
F. M. Izrailev, V. Dossetti-Romero, Univ. Autónoma de Puebla (Mexico); A. A. Krokhin, Univ. Autónoma de Puebla (Mexico) and Univ. of North Texas (USA); L. Tessieri, Univ. Michoacana de San Nicolás de Hidalgo (Mexico)

SESSION 5 DYNAMICAL SYSTEMS AND NOISE-DRIVEN SYSTEMS II

135 **Dynamics importance sampling for the activation problem in nonequilibrium continuous systems and maps** [5471-18]
S. Beri, Lancaster Univ. (United Kingdom); R. Mannella, Univ. di Pisa (Italy); P. V. E. McClintock, Lancaster Univ. (United Kingdom)

145 **Modeling and controlling of stochastic dynamics of complex nonlinear systems (Invited Paper)** [5471-19]
D. G. Luchinsky, P. V. E. McClintock, A. N. Silchenko, Lancaster Univ. (United Kingdom); V. N. Smelyanskiy, NASA Ames Research Ctr. (USA); M. I. Dykman, Michigan State Univ. (USA)

SESSION 6 SYNCHRONIZATION, RATCHETS, AND SELF-ORGANIZATION I

159 **Extreme fluctuations in small-world-coupled autonomous systems with relaxational dynamics (Invited Paper)** [5471-21]
H. Guclu, G. Korniss, Rensselaer Polytechnic Institute (USA)

171 **Estimation of periodicity in synchronized systems** [5471-22]
A. P. Nikitin, N. G. Stocks, Univ. of Warwick (United Kingdom)

182 **Ratchets in homogeneous extended systems: internal modes and the role of noise** [5471-23]
A. Sánchez, Univ. Carlos III de Madrid (Spain); L. Morales-Molina, F. G. Mertens, Univ. Bayreuth (Germany); N. R. Quintero, Univ. de Sevilla (Spain) and Univ. de Granada (Spain); J. Buceta, K. Lindenberg, Univ. of California/San Diego (USA)

193 **Noise-sustained oscillation and synchronization of excitable media with stirring** [5471-24]
C. Zhou, J. Kurths, Univ. Potsdam (Germany); Z. Neufeld, Los Alamos National Lab. (USA); I. Z. Kiss, Univ. of Leeds (United Kingdom)

203 **Parrondo's games and the zipping algorithm** [5471-70]
P. Amengual, R. Toral, Instituto Mediterráneo de Estudios Avanzados (Spain)

SESSION 7 STOCHASTIC RESONANCE, COHERENCE, AND BISTABLE SYSTEMS I

213 **Signal-to-noise ratio gain in stochastic resonators driven by colored noises** [5471-26]
P. Makra, Z. Gingl, T. Fülei, Univ. of Szeged (Hungary)

222 **Optimal quantization for energy-efficient information transfer in a population of neuron-like devices** [5471-27]
M. D. McDonnell, Univ. of Adelaide (Australia); N. G. Stocks, Univ. of Warwick (United Kingdom); C. E. M. Pearce, D. Abbott, Univ. of Adelaide (Australia)

SESSION 8 STOCHASTIC RESONANCE, COHERENCE, AND BISTABLE SYSTEMS II

233 **Study of stochastic synchronization in vertical cavity lasers (Invited Paper)** [5471-28]
S. Barbay, Lab. de Photonique et de Nanostructures, CNRS (France); S. Lepri, INFM (Italy); G. Giacomelli, Istituto Nazionale di Ottica Applicata (Italy) and INFM (Italy)

244 **Spatiotemporal stochastic resonance in an array of Schmitt triggers** [5471-30]
T. Stemler, M. Scheuermann, H. Benner, Technische Univ. Darmstadt (Germany)

251 **System size resonance in attractor neural networks** [5471-72]
M. A. de la Casa, E. Korutcheva, J. de la Rubia, Univ. Nacional de Educación a Distancia (Spain); J. M. R. Parrondo, Univ. Complutense de Madrid (Spain)

258 **Stochastic resonance between noise-sustained patterns: local and nonlocal coupling** [5471-32]
B. von Haeften, G. G. Izús, S. E. Mangioni, A. D. Sánchez, Univ. Nacional de Mar del Plata (Argentina); H. S. Wio, Instituto de Física de Cantabria (Spain)

SESSION 9 NOISE IN INTERDISCIPLINARY APPLICATIONS I

266 **Stochastic epidemic outbreaks: why epidemics are like lasers (Keynote Paper)** [5471-33]
I. B. Schwartz, Naval Research Lab. (USA); L. Billings, Montclair State Univ. (USA)

280 **Deterministic versus noisy behavior in sidebranching** [5471-34]
R. González-Cinca, Univ. Politècnica de Catalunya (Spain); Y. Couder, J. Maurer, Ecole Normale Supérieure (France); A. Hernández-Machado, Univ. de Barcelona (Spain)

289 **Social networks and spreading of epidemics** [5471-81]
S. Trimper, D. Zheng, M. Brandau, Martin-Luther-Univ. Halle-Wittenberg (Germany)

SESSION 10 NOISE IN INTERDISCIPLINARY APPLICATIONS II

298 **Stochastic approach to highway traffic** [5471-37]
R. Mahnke, Univ. Rostock (Germany); J. Kaupužs, Univ. of Latvia (Latvia); I. Lubashevsky, General Physics Institute (Russia); J. Tolmacheva, Univ. Rostock (Germany) and Institute of Single Crystals (Ukraine)

311 **Correlations in finance: a statistical approach** [5471-38]
J. M. López-Alonso, J. Alda, Univ. Complutense de Madrid (Spain)

322 **Fluctuations and noise in cancer development** [5471-39]
M. J. Berryman, Univ. of Adelaide (Australia); S. L. Spencer, Univ. of Adelaide (Australia) and Univ. of Michigan (USA); A. G. Allison, D. Abbott, Univ. of Adelaide (Australia)

333 **Application of stochastic volatility models to German DAX data** [5471-40]
R. Remer, R. Mahnke, Univ. Rostock (Germany)

SESSION 11 ANALYSIS, NEW METHODS, AND ISSUES OF GENERAL IMPORTANCE II

344 **Inference of stochastic nonlinear oscillators with applications to physiological problems (Invited Paper)** [5471-41]
V. N. Smelyanskiy, NASA Ames Research Ctr. (USA); D. G. Luchinsky, Lancaster Univ. (United Kingdom)

355 **Theory for the drastic facilitation of the onset of global chaos between separatrices of a Hamiltonian system** [5471-42]
S. M. Soskin, Institute of Semiconductor Physics (Ukraine) and Lancaster Univ. (United Kingdom); O. M. Yevtushenko, Abdus Salam International Ctr. for Theoretical Physics (Italy); R. Mannella, Lancaster Univ. (United Kingdom) and Univ. di Pisa, INFM (Italy)

367 **Fluctuational instabilities of alkali and noble metal nanowires (Invited Paper)** [5471-43]
J. Bürki, C. A. Stafford, D. L. Stein, Univ. of Arizona (USA)

SESSION 12 ANALYSIS, NEW METHODS, AND ISSUES OF GENERAL IMPORTANCE III

380 **Quasi-symplectic stochastic integration (Invited Paper)** [5471-44]
R. Mannella, Univ. di Pisa, INFM (Italy)

SESSION 13 NOISE IN INTERDISCIPLINARY APPLICATIONS III

393 **Distribution of residence times in bistable noisy systems with time-delayed feedback** [5471-47]
J. Houlihan, G. Huyet, Th. Busch, S. P. Hegarty, D. Goulding, D. Curtin, National Univ. of Ireland (Ireland); C. Masoller, Univ. de la República (Uruguay)

SESSION 14 SYNCHRONIZATION, RATCHETS, AND SELF-ORGANIZATION II

407 **Exact ratchet description of Parrondo's games with self-transitions** [5471-48]
P. Amengual, R. Toral, Instituto Mediterráneo de Estudios Avanzados (Spain)

416 **Influence of green noise on the parametric synchronization phenomenon** [5471-49]
M. V. Sviridov, S. A. Guz, Moscow Institute of Physics and Technology (Russia); R. Mannella, Univ. di Pisa, INFM (Italy)

425 **Global and local noise on diffusively coupled neural networks** [5471-51]
M. N. Lorenzo, N. Montejo, V. Pérez-Muñuzuri, V. Pérez-Villar, Univ. de Santiago de Compostela (Spain)

POSTER SESSION

Analysis, New Methods, and Issues of General Importance

432 **Quantum statistical information functional for random matrix ensembles** [5471-54]
M. M. Duras, Cracow Univ. of Technology (Poland)

437 **Possibility of measuring weak noise in nonlinear systems** [5471-57]
E. D. Surovyatkina, Space Research Institute (Russia)

Noise-Induced States and Transitions

445 **Noise-induced order in type-I intermittency** [5471-62]
H. Suetani, Tokyo Institute of Technology (Japan) and RIKEN—The Institute of Physical and Chemical Research (Japan); T. Horita, Univ. of Tokyo (Japan); S. Mizutani, NTT Corp. (Japan)

Dynamical Systems and Noise-Driven Systems

457 **Spatial-temporal structures in noise processes: microscopic and macroscopic dynamics** [5471-63]
J. M. López-Alonso, J. Alda, Univ. Complutense de Madrid (Spain)

468 **Width of the chaotic layer associated with a separatrix of a one-dimensional Hamiltonian system subjected to a low-frequency time-periodic perturbation** [5471-64]
S. M. Soskin, Institute of Semiconductor Physics (Ukraine) and Lancaster Univ. (United Kingdom); O. M. Yevtushenko, Abdus Salam International Ctr. for Theoretical Physics (Italy); R. Mannella, Lancaster Univ. (United Kingdom) and Univ. di Pisa, INFM (Italy)

Synchronization, Ratchets, and Self-Organization

480 **Energy fluctuations and the singularity of specific heat in 3D Ising model** [5471-66]
J. Kaupužs, Univ. of Latvia (Latvia)

492 **Synchronization of phase slips in chaotic map** [5471-68]
K. Arai, S. Mizutani, NTT Corp. (Japan)

504 **Acceleration of diffusion in switching periodic sawtooth potential** [5471-69]
A. A. Dubkov, Nizhni Novgorod State Univ. (Russia); B. Spagnolo, INFM (Italy) and Univ. degli Studi di Palermo (Italy)

510 **Mathematical background of Parrondo's paradox** [5471-71]
E. Behrends, Freie Univ. Berlin (Germany)

520 **Parrondo's games with chaotic switching** [5471-86]
T. W. Tang, A. G. Allison, D. Abbott, Univ. of Adelaide (Australia)

Stochastic Resonance, Coherence, and Bistable Systems

531 **Enhancement of deterministic stochastic resonance in coupled chaotic systems** [5471-74]
S. Mizutani, K. Arai, NTT Corp. (Japan)

541 **Exact solutions to stochastic resonance systems and nonlinear stochastic circuits** [5471-75]
J. J. Suárez, Instituto Venezolano de Investigaciones Científicas (Venezuela) and Lancaster Univ. (United Kingdom); J. A. González, Instituto Venezolano de Investigaciones Científicas (Venezuela)

550 **Cross-spectral measurement of neural signal transfer** [5471-76]
M. D. McDonnell, Univ. of Adelaide (Australia); S. Sethuraman, L. B. Kish, Texas A&M Univ. (USA); D. Abbott, Univ. of Adelaide (Australia)

Disordered Systems

560 **Hopping by Levy flights and nonlinear relation between diffusion and conductivity** [5471-77]
V. E. Arkhincheev, Buryat Science Ctr. (Russia)

568 **Harmonic velocity noise: new features of noise-driven system in long times** [5471-78]
J.-D. Bao, Y.-L. Song, Beijing Normal Univ. (China); Q. Ji, Hebei Univ. of Technology (China) and Beijing Normal Univ. (China); Y.-Z. Zhuo, China Institute of Atomic Energy (China) and Institute of Theoretical Physics (China)

575 **Random walks models with intermediate fractional diffusion asymptotics** [5471-79]
A. I. Saichev, S. G. Utkin, Nizhni Novgorod State Univ. (Russia)

Noise in Interdisciplinary Applications

584 **Multiplicative versus additive noise in multistate neural networks** [5471-83]
D. Bollé, J. Busquets Blanco, T. Verbeiren, Katholieke Univ. Leuven (Belgium)

595 **Path integrals in fluctuating markets** [5471-84]
F. D. R. Bonnet, A. G. Allison, D. Abbott, Univ. of Adelaide (Australia)

612 **Motion in random fields: an application to stock market data** [5471-85]
J. P. Gleeson, Univ. College Cork (Ireland)

625 *Author Index*
